AGENTIC AI WITH PRACTICAL ON N8N

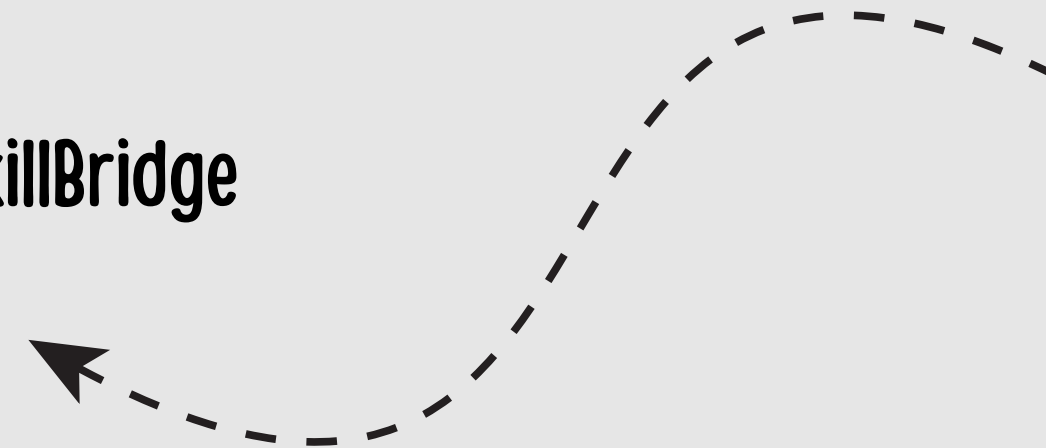

BY MUHAMMAD TAYYAB

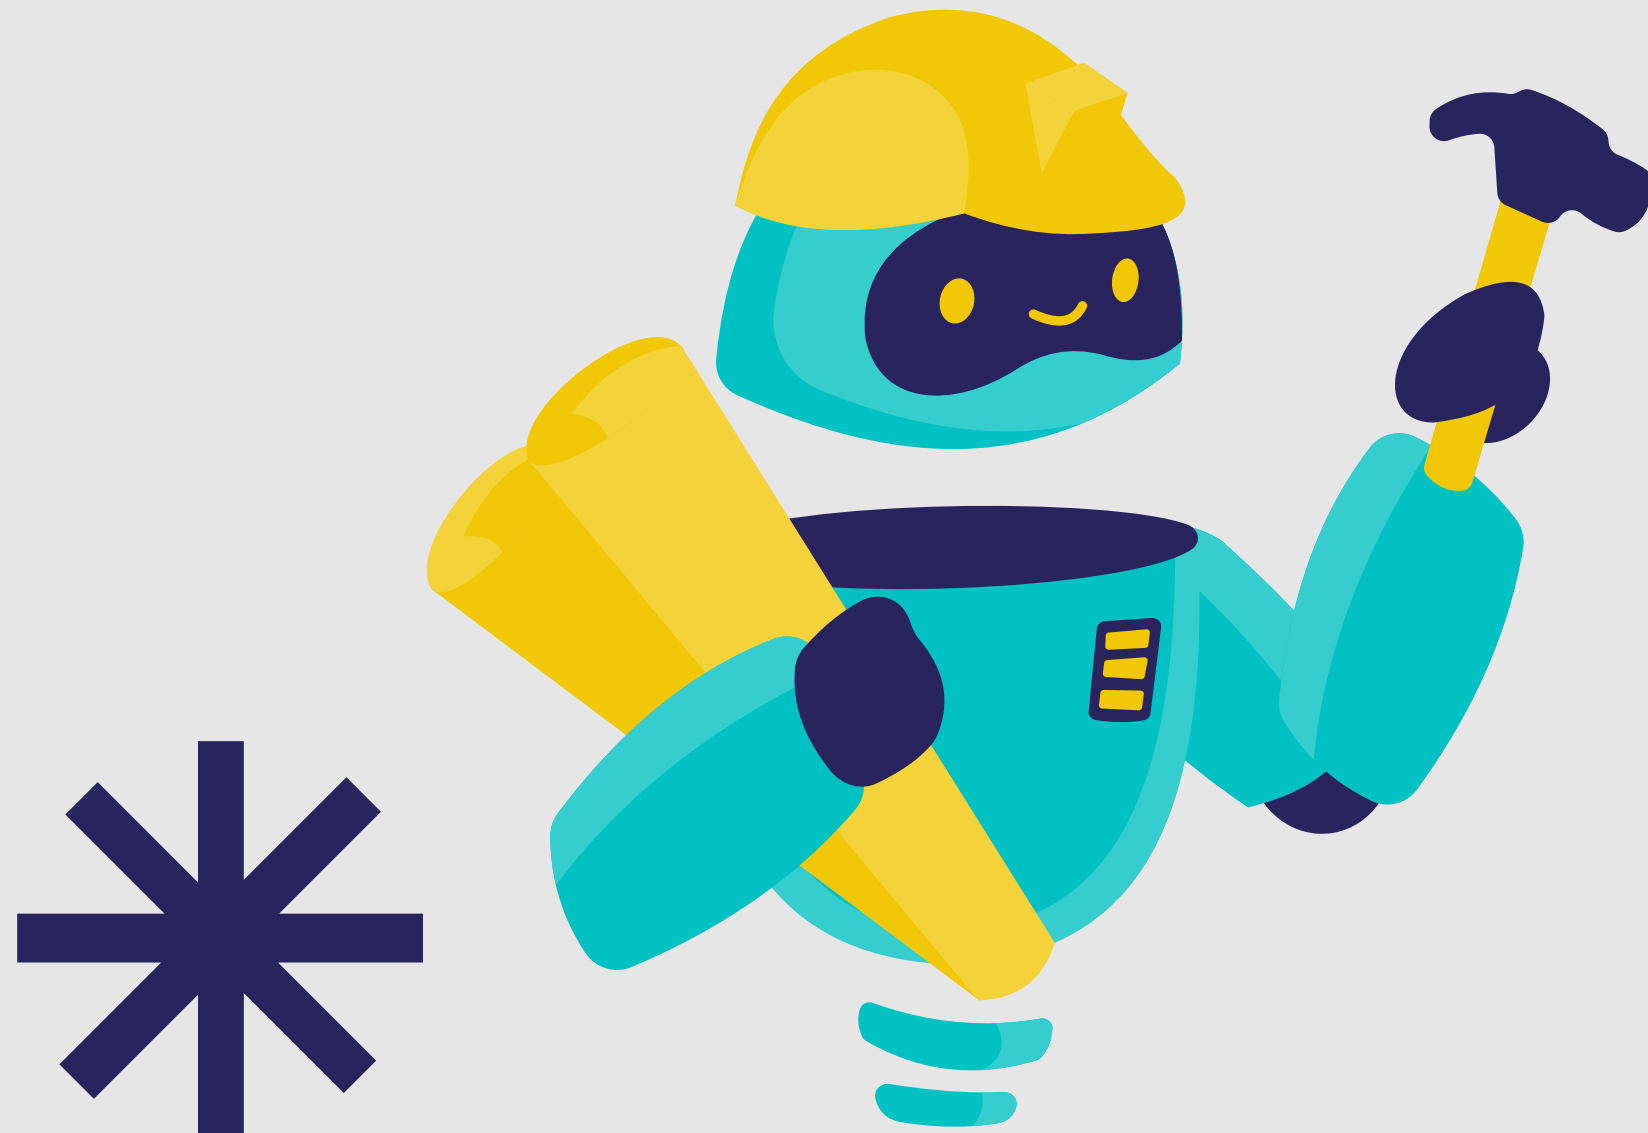

Hi there! I'm Tayyab!

Introduction

- BS in Computer Science from FAST and MS in AI from BAU, Turkey.
- 7 years of industry experience in developing tech solutions.
- For the past 3 years, focused on building AI-driven products for companies.
- Agentic-AI Instructor at AISkillBridge

TRANSFORMERS

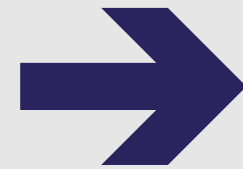

- GOOGLE INTRODUCED THE TRANSFORMER ARCHITECTURE IN 2017 WITH THE PAPER “ATTENTION IS ALL YOU NEED.”
- IT REPLACED RECURRENT MODELS (RNNS, LSTMS) WITH A SELF-ATTENTION MECHANISM FOR BETTER CONTEXT HANDLING AND PARALLEL PROCESSING.
- THE MODEL USES ENCODERS AND DECODERS TO UNDERSTAND AND GENERATE SEQUENCES EFFICIENTLY.
- TRANSFORMERS BECAME THE FOUNDATION FOR MODELS LIKE BERT, GPT, AND T5, ENABLING LARGE-SCALE LANGUAGE UNDERSTANDING AND GENERATION.
- THIS ARCHITECTURE NOW POWERS MOST GENERATIVE AI SYSTEMS USED TODAY.

TECHNOLOGY VS TOOLS

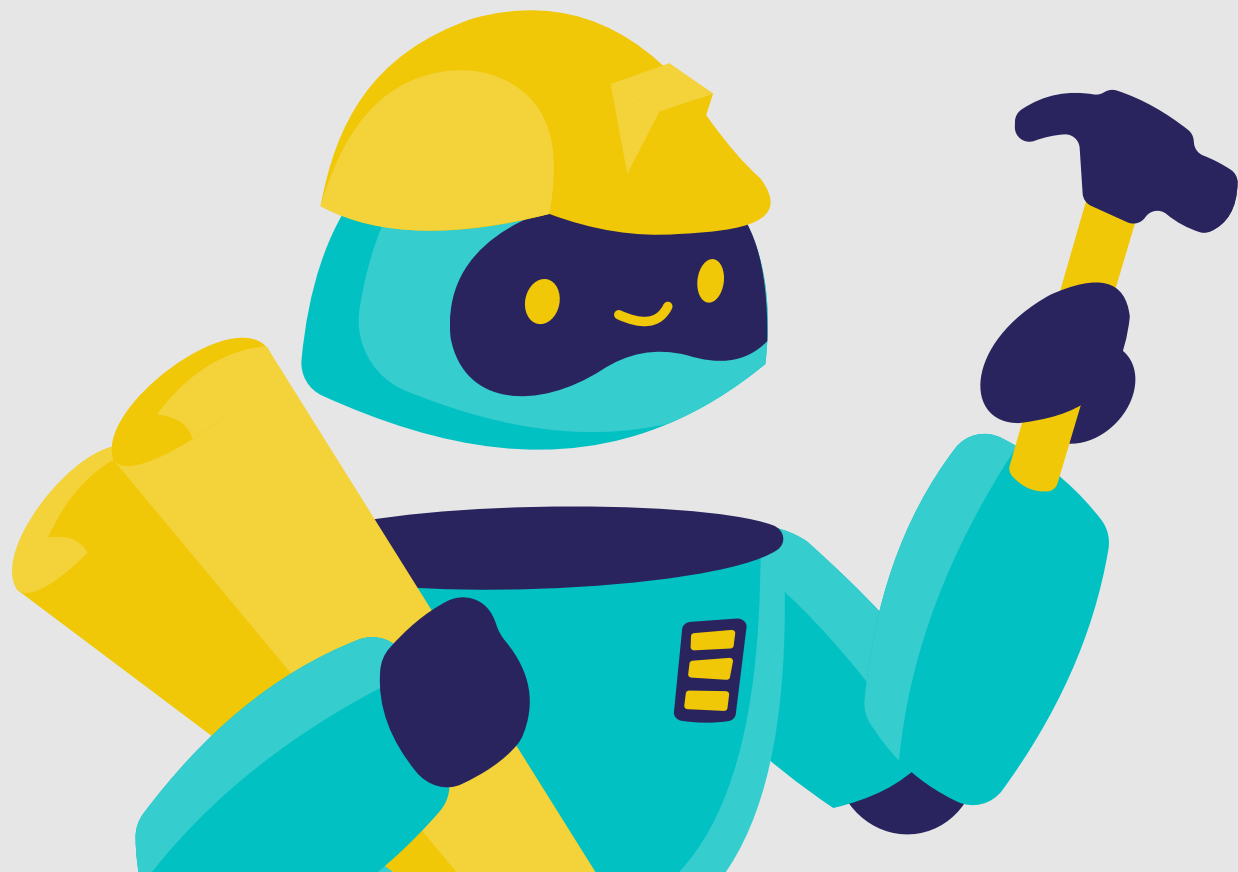

TRANSFORMERS

N8N

LLMS

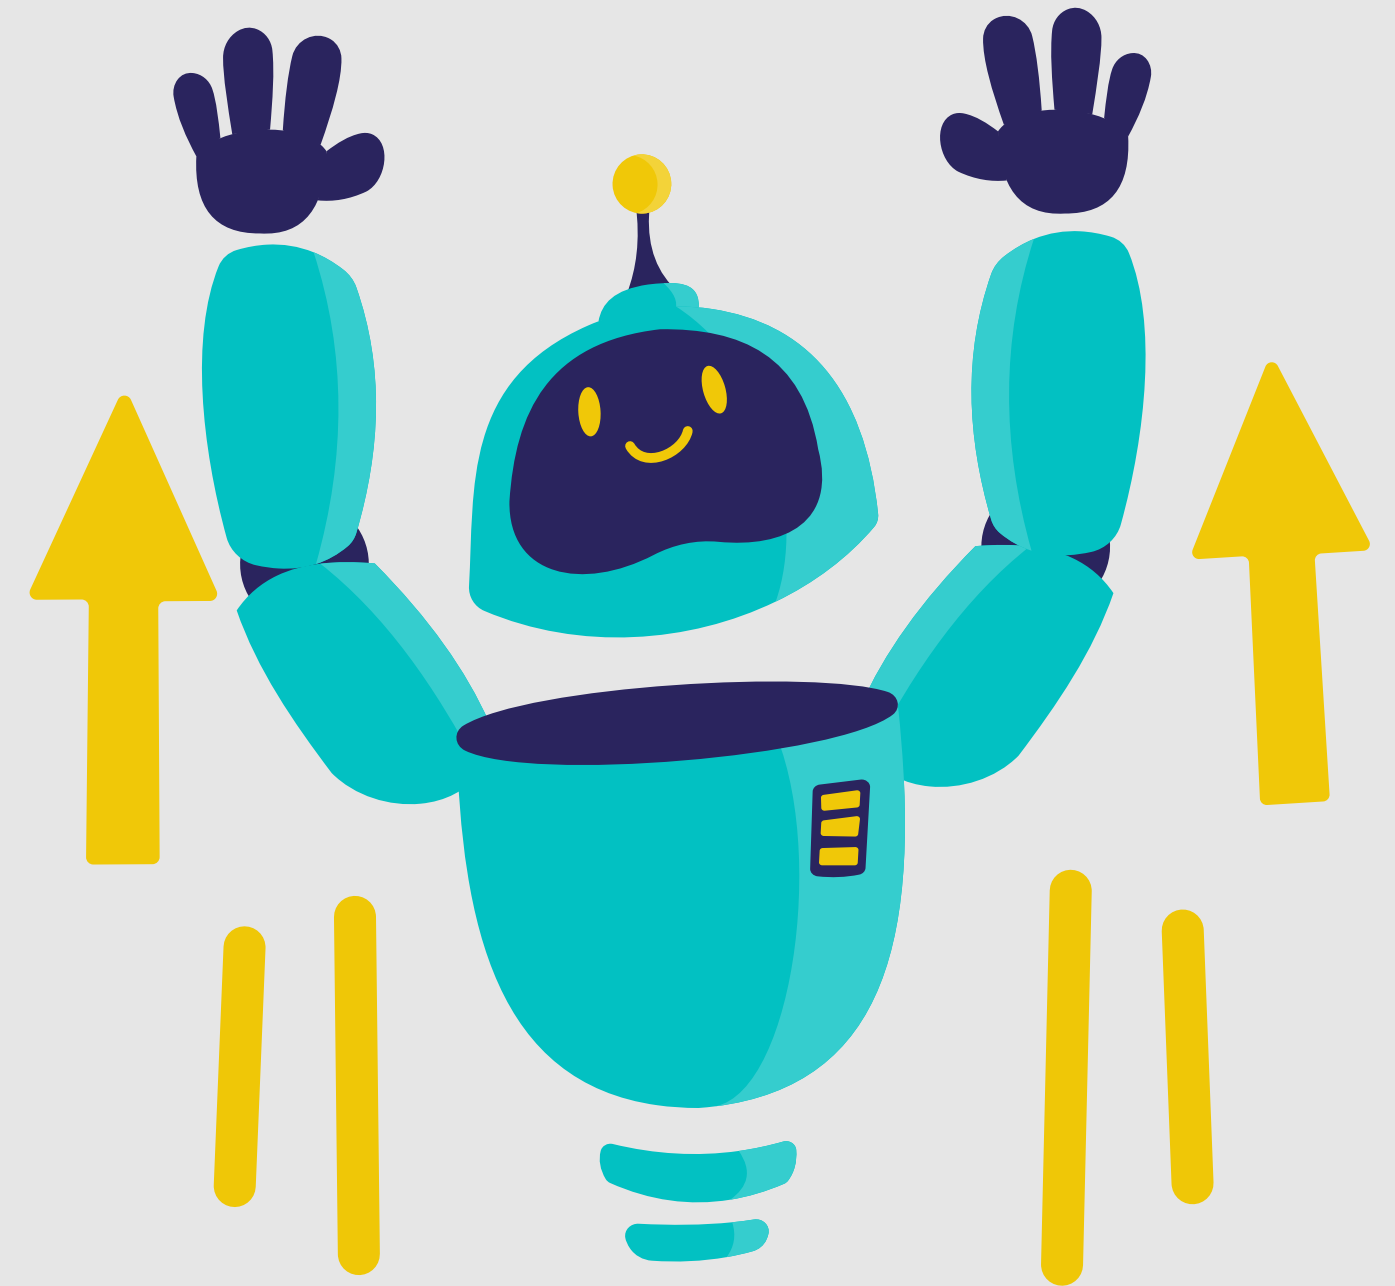

LANG-CHAIN

AI AGENTS || AGENTIC AI

Aspect	LLM (Large Language Model)	AI Agent
Core Function	Generates and understands text based on patterns in data (e.g., answering questions, writing code).	Uses an LLM (and possibly other tools) to plan and perform actions toward a specific goal.
Autonomy	Responds only when prompted by a user — reactive .	Can act autonomously , make decisions, and interact with systems or APIs without direct user input.

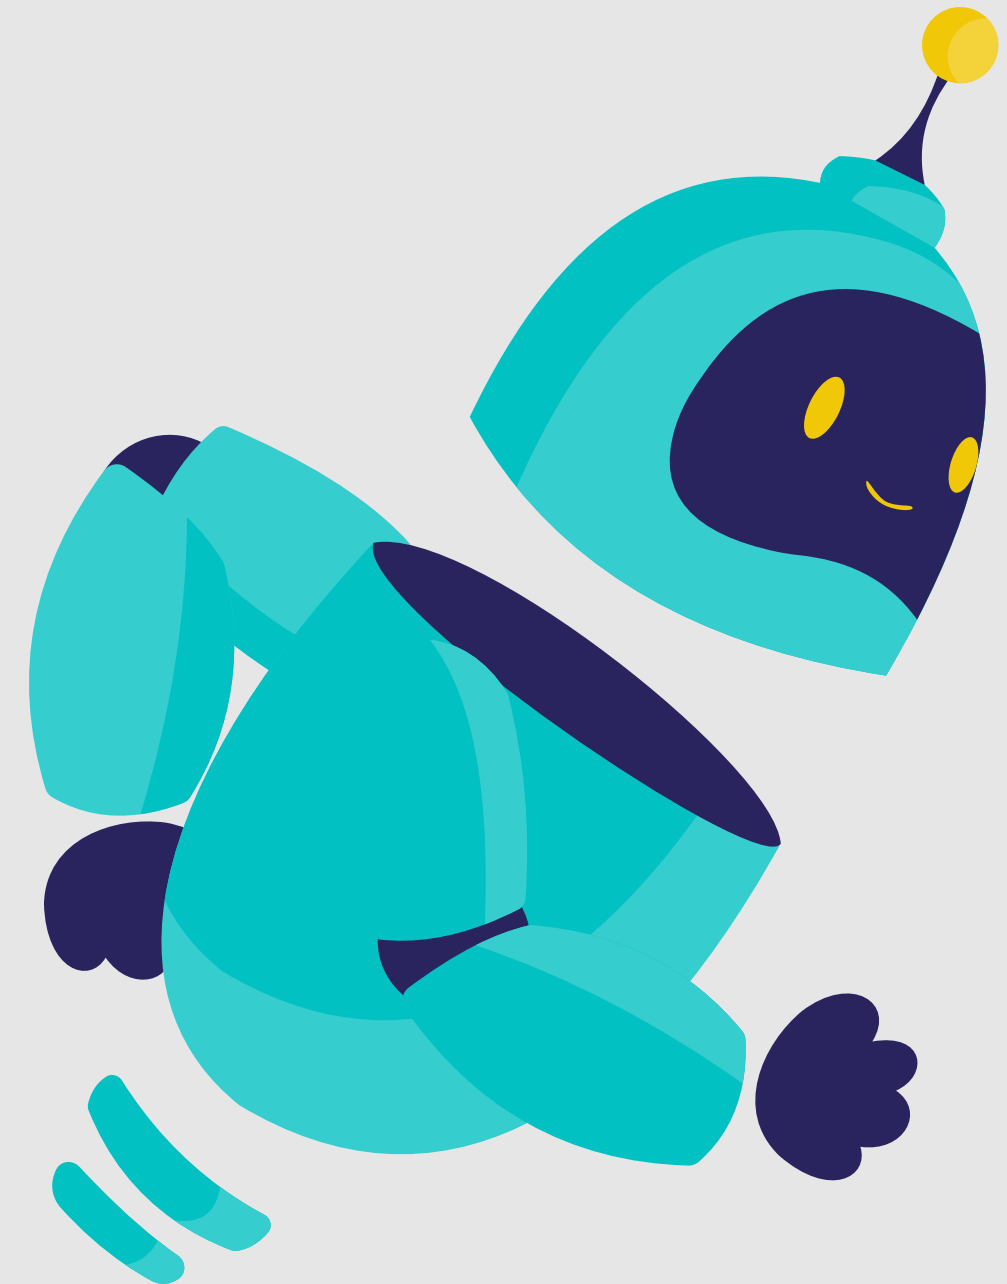

N8N (PRONOUNCED “N-EIGHT-N”) IS AN OPEN-SOURCE WORKFLOW AUTOMATION TOOL THAT LETS YOU CONNECT DIFFERENT APPS, APIS, AND SERVICES TOGETHER — KIND OF LIKE ZAPIER OR MAKE (FORMERLY INTEGROMAT), BUT SELF-HOSTABLE AND MORE FLEXIBLE.

N8N ALLOWS YOU TO:

- AUTOMATE REPETITIVE TASKS (E.G., SEND AN EMAIL WHEN A NEW LEAD IS ADDED TO YOUR CRM)
- MOVE DATA BETWEEN DIFFERENT SERVICES (LIKE NOTION → SLACK → GOOGLE SHEETS)
- INTEGRATE WITH APIS (REST, GRAPHQL, ETC.)
- RUN CONDITIONAL LOGIC, LOOPS, AND CODE SNIPPETS IN WORKFLOWS

N8N

CREATION

CREATE A POST USING LLM

INTEGRATE

INTEGRATE LINKEDIN WITH N8N

POST

MAKE AN AUTOMATIC POST ON LINKEDIN

LETS MAKE AN AGENT
